

LEGO® Serious Play® Build Levels I

System models

Build system models to understand the forces, dynamics and impacts of and in systems.

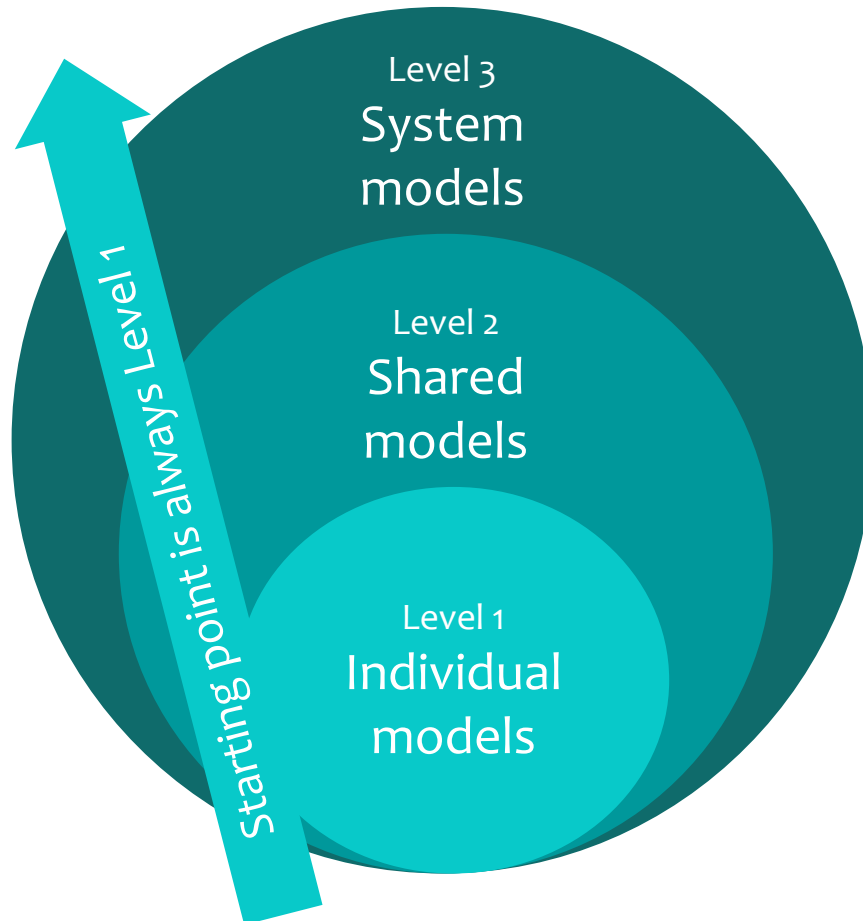

Shared models

Build shared models to create mutual understanding on topics of common.

Individual models

Build alone and share to make »3D prints of thoughts« others are able to see, understand and question to help create common meaning.

LEGO® Serious Play® Build Levels II

Build Level 3

Interact with dynamic systems. Understand how factors influence each other. Explore risks, opportunities and unintended consequences of different scenarios and strategies on shared visions.

Build Level 2

Explore how others see the same ideas differently. Then create shared understanding and common meaning.

Build Level 1

Learn enhanced communication. Use auditory, visual and kinaesthetic modes to express your thoughts and feelings and understand others ideas, thoughts and feelings.
